SUMMARY

Junior BackEnd ASP.NET Developer with expertise in C# and Docker, dedicated to crafting high-quality, scalable, and maintainable code. Demonstrated ability to rapidly learn new technologies and apply best practices in software development. Offers a proactive approach and a strong commitment to enhancing team productivity and delivering impactful solutions.

EDUCATION

Bachelor Of Science , Major in Computer Science

📅 10/2021 - 05/2025   📍 Menofia University

GPA **3.72** / 4.0

- Graduated With Grade : Excellent with Honors 87.88%

Military Service : Exemption

EXPERIENCE

BackEnd ASP .NET , ITI

📅 07/2024 - 09/2024   📍 Suez, Egypt

- Earned Skills :C# , SQL Server , EF Core , LINQ , ASP .Net MVC Core , Freelance, Final Project : Crud Operation for Employee Management System ,Applied Entity Frame work to optimize database queries and reduce response time.

PROJECTS

Graduation Project : PhysioCare App

📅 10/2024 - 07/2025   📍 Faculty Science At Menofia

This System provide online , At Clinic and At-home Doctor Consultation, Analyses at laboratory and at home ,nursing service through booking nurse at home.

- I use : C# , SQL Server ,EF Core , LINQ , ASP .NET API Core , Onion Architecture , Email Service , MediatR And CQRS , AutoMapper , Asynchronous Code ,Paging ,Rate Limiting, JWT Identity , Refresh Token , Documenting API With Swagger , Deployment API Swagger using Monster ASP (Website) , Integrated Google Sign-In , Integrated Stripe Payment
- Grade : Excellent (190/200)

Simple Blog Management

📅 08/2024 - 08/2024

built with C# 12 and .NET 8. It provides CRUD (Create, Read, Update, Delete) operations for blog posts, using Entity Framework Core for data access and AutoMapper for object mapping

- Blog Management: Create, retrieve, update, and delete blog posts. Pagination & Search: Support paginated retrieval and search of blogs by terms. DTO Usage : Use Data Transfer Objects (DTOs) for input and output models. ,Error Handling : Implement custom exceptions for not found and invalid blog operations. , Logging : Log errors during service operations. Separation of Concerns : Follow a layered architecture with services, repositories, and controllers, deployment on IIS
